**Subject:** FW: Honolulu High-Capacity Transit Corridor Project

Hi Gloria –

In order to complete the Final Environmental Impact Statement for the Honolulu rail project, we need to finalize the alignment in the vicinity of the post office facilities in the Honolulu Airport area. Therefore, I am following up on my earlier email regarding whether there would be any issues if we require land/easement from the post office property. Your confirmation that the USPS would be amenable to the City and County of Honolulu acquiring the required land/easement, subject to negotiation, would be appreciated.

At this time, the only information regarding what the project needs from the USPS is what was provided to you from the Honolulu USPS people.

Thanks for your help.

Faith Miyamoto

I am checking with our Inspection Service regarding security issues, but I am requesting any documentation you have received, i.e. appraisal, Phase I, that references our parcel(s), be forwarded to my attention.

I will keep you posted as I receive further information.

Hi Gloria –

As I related earlier in our telephone conversation, I am with the City and County of Honolulu Department of Transportation Services, the local lead agency for the transit project. The project would require land from two USPS properties: the Main Post Office at Honolulu International Airport and the Pearl City Post Office. At our meeting on May 12, 2009, local USPS staff told us that they have some security and liability concerns and that the issue would need to be decided at a higher level. Therefore, the reason for my call was to confirm that the USPS has agreed to our acquisition of the required land/easement and that the next steps would be to agree on purchase price and schedule. At the end of our conversation, you related that you would check on whether further discussion would be required.

Thanks for talking with me and I look forward to working with you in the future.
